PHILOSOPHY OF CARE

It is a belief of the organisation and staff working at Prosperity Housing Group that change is always possible, and that behaviour is within the control of the individual. Each individual makes choices although not always with conscious awareness of themselves or of others. Any change in behaviour, thinking or feeling becomes the basis for wider changes to follow.

All people are therefore valued, are of value and are not written off or labelled because of their behaviour. We value diversity and seek to enlighten those we work with to see this value also. It is essential that the environment we create is a safe environment that promotes change, and that part of this is physical safety, therefore, we are not tolerant of dangerous or threatening behaviour. It is confronted and worked on and we expect the full support of referring agencies with this.

We recognise that all of our service users are individuals, and that suitable approaches and models may be different for each individual based on their strengths, interests and characteristics. We also understand that approaches need to develop over time as each individual grows and develops (both physically and emotionally). This may be due to their emotional state, level of understanding, chronological age or even an approach that captures their imagination helping them to engage. The care staff at Prosperity Housing Group will work towards positively developing individual qualities, which will give our service users an opportunity for personal growth and development.
